MATERIAL SAFETY DATA SHEET
Chem International, Inc.

1. Chemical Product and Company Identification

Product Name ..............................................Hydrogenated Tallow, Distilled
Product Description .................................Hydrogenated Tallow, Distilled

Chem International, Inc.
P.O. Box 5501
Greenville, SC  29606

Emergency Telephone Numbers
Transportation:
CHEMTREC  1-800-424-9300
(703-527-3387 Outside United States)
Information:
Chem International, Inc. – 864-458-7868

2. Composition/Information on Ingredients

</table>

3. Hazards Identification

Emergency Overview:
Danger! Corrosive: Causes eye, skin, and mucous membrane burns.
Tan solid, amine odor.
Molten material may cause thermal burns.
Spills are slippery, may cause falls.

Potential Health Effects:
Corrosive (Eyes, Skin, Mucous Membranes)

Routes of Exposure:
Contact, Inhalation, Ingestion

Target Organ Effects:

Eyes
Causes eye burns.
Contact with product at elevated temperatures can result in thermal burns.

Skin
Causes skin burns.
Contact with product at elevated temperatures can result in thermal burns.
**Ingestion**
Can burn mouth, throat, and stomach.

**Inhalation**
Inhalation of vapors or mists may cause damage to mucous membranes or severe irritation of respiratory passages.

**Carcinogenicity**

### 4. First Aid Measures

**Eye Contact:**
Immediately flush eyes with water for at least 15 minutes. Do not let victim rub eyes. Seek medical attention immediately.

**Skin Contact:**
Immediately wash skin with plenty of soap and water while removing contaminated clothing and shoes. Get medical attention. Contaminated clothing should be discarded in a manner which limits further exposure. If molten material contacts skin, cool rapidly with cold water. Do not attempt to peel from skin. Obtain medical attention for thermal burns.

**Ingestion:**
If swallowed, do **NOT** induce vomiting. Give victim a glass of water or milk. Call a physician or poison control center immediately. Never give anything by mouth to an unconscious person.

**Inhalation:**
Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

### 5. Fire Fighting Measures

**Flammable Properties:**

</table>

**Extinguishing Media:**
Use water spray, dry chemical, carbon dioxide, or foam extinguishing agents. Direct application of high pressure water streams may scatter burning material.

**Hazardous Products of Combustion:**
Thermal decomposition products may include oxides of carbon and nitrogen and hydrogen cyanide.
**Fire Fighting Instructions:**

As in any fire, prevent human exposure to fire, smoke, fumes, or products of combustion. Evacuate non-essential personnel from the fire area.

Fire fighters should wear full protective gear including self-contained breathing apparatus (SCBA) with full face shield operated in positive pressure mode, and full protective clothing.

Closed containers may swell and rupture when exposed to extreme heat. Water spray or fog may be used to cool containers. Avoid spraying of water directly into containers of burning material as frothing may result.

Water runoff may cause environmental damage. Dike and collect water used to fight fires. Do not allow contaminated water to enter waterways.

**Fire and Explosion Hazards:**

This product is not defined as flammable or combustible. However, under fire conditions it may support combustion and decompose to give off toxic gases such as carbon monoxide, carbon dioxide and nitrogen oxides. Under non-ideal oxidizing conditions, incomplete combustion may produce hydrogen cyanide. This product is not sensitive to static discharge.

---

**6. Accidental Release Measures**

**Personal Precautions:**

Individuals involved in clean up activities must use appropriate protective equipment as listed in Section 8. This material forms slippery surfaces on floors, posing an accident risk.

**Environmental Precautions:**

If material is released into the environment (air, land, water - via sewage system), the user should determine whether spill must be reported to appropriate local, state, and/or federal authorities.

**Spill Response Procedures:**

Isolate spill area and restrict non-essential personnel from area. All personnel involved in spill cleanup should follow good industrial hygiene practices. Use adequate ventilation and/or wear a NIOSH-approved organic vapor respirator with dust, mist, and fume filter to minimize inhalation exposure. Stop source of spill if this is possible without being injured. If the material is in a liquid phase, small spills should be absorbed with a suitable, inert material (e.g., sand or earth). Remove the absorbed material and place in an appropriate chemical waste container for disposal. Flush the spill area with detergent and water. Large spills should be diked to prevent spreading. Pump spilled material to salvage according to a predetermined plan. Remove residual material and flush spill area with detergent and water.
7. Handling and Storage

Handling:
Do not breathe vapors or mists.
Avoid contact with eyes, skin, and clothing.
Wear protective equipment when handling this product to avoid eye and skin contact.
Wash thoroughly after handling.
Emptied containers may retain product residues. Follow all warnings and precautions even after container is emptied.

Storage:
Store away from foodstuffs or animal feed.
Containers should be stored in a cool, dry, well-ventilated area away from acidic or oxidizing materials.
MAXIMUM STORAGE TEMPERATURE – 120°F/48.88°C
Keep container closed.
Empty containers may retain product residue, precautions apply to empty containers.

8. Exposure Controls/Personal Protection

Engineering Controls:
Good general ventilation should be sufficient to control airborne levels.

Personal Protective Equipment:

Eye/Face - Because eye contact with this product may cause severe and possibly permanent damage, chemical goggles and/or a full face shield must be worn whenever handling this product.

Respiratory – If use conditions (e.g., elevated temperature) generate vapors or mist, use NIOSH-approved organic vapor/acid gas respirator with dust, mist and fume filter to reduce potential for inhalation exposure. When exposure potential necessitates a higher level of protection, use a NIOSH-approved, positive-pressure/pressure-demand, air-supplied respirator. Respirator cartridges or canisters must be changed frequently (following each use or at the end of the workshift) to assure break-through exposure does not occur.

Skin/Body – It is essential that skin contact with this product be prevented through the use of impervious clothing, gloves, and footwear selected with regard for use condition exposure potential. Protective equipment made of neoprene or nitrile rubber is recommended.

Other Precautions - Safety shower, with quick opening valves which stay open, and eye wash station should be located in exposure area. Reduce exposure by proper use of personal protective equipment. Wash hands and face before eating, drinking, or smoking. Long sleeved clothing may be used to minimize skin contact.

Occupational Exposure Limits:
No exposure limits established for this product, or individual components.
9. Physical and Chemical Properties

- Physical State: Solid
- Color: Tan
- Odor: No Odor
- Specific gravity (water = 1.0): 0.195
- Solubility (in water): Insoluble
- pH: 10 @ 5% in H2O
- Vapor pressure (mmhg): No information
- Vapor density (air = 1): No information
- Boiling point (F/C): No information
- Percent volatile: <1%

10. Stability and Reactivity

**Conditions to Avoid:**
- Stability: This product is stable at ambient temperature and atmospheric pressures. It is not self-reactive.
- Conditions to Avoid: High temperatures, Strong acids and oxidizers.
- Materials to Avoid: Avoid contact with strong oxidizers and strong acids.
- Hazardous Decomposition Products: Oxides of carbon and nitrogen may be emitted if product burns. This material is expected to be thermally stable in the absence of oxygen or air to temperatures of 350°F.
- Hazardous Polymerization: Hazardous polymerization is not expected to occur.

11. Toxicological Information

There is no toxicological data available on this product.

12. Ecological Information

There is no ecological data available on the product.

13. Disposal Considerations

As originally offered, this product if disposed of, is not considered a hazardous waste under current Resource Conservation and Recovery Act (RCRA) regulations (40CFR 261). State and local regulations should also be consulted regarding proper disposal.
14. Transport Information

**Land**

Department of Transportation (DOT)
UN 3259, Amines, solid, corrosive, N.O.S., (Contains hydrogenated tallow amines), 8, PG III

**Air**

International Air Transport Association (IATA)
UN 3259, Amines, solid, corrosive, N.O.S., (Contains hydrogenated tallow amines), 8, PG III

**Sea**

**International Regulations**

**Canadian Environmental Protection Act (CEPA)**
Listed in the Domestic Substance List

**European Inventory of Existing Commercial Chemical Substances (EINECS)**
Exempt as polymer

**Japanese List of Existing and New Chemical Substances (as regulated by the Ministry of International Trade and Industry - MITI)**
No Information

**Australian Inventory of Chemical Substances (AICS)**
No Information
European Communities (EC) Classification

Hazard symbol(s) ...................... : C (Corrosive)
Risk phrases .......................... : R34 - Causes burns.
...................................... : R36/37/38 - Irritating to eyes, respiratory system and skin.
Safety phrases ...................... : S26 - In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
...................................... : S28 - After contact with skin, wash immediately with plenty of 2 - 3% acetic acid solution.
