SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier
Trade name : Hydrogenated Tallow Amine

1.2 Relevant identified uses of the substance or mixture and uses advised against
Uses of the Substance / Mixture : Specific use(s): Use as an intermediate, Surfactants for various applications

1.3 Details of the supplier of the safety data sheet
Company : Chem International, Inc.
6099 Ponders Court
Greenville, SC 29615
Telephone number: 864-458-7868

1.4 Emergency telephone
FOR EMERGENCIES INVOLVING A SPILL, LEAK, FIRE, EXPOSURE OR ACCIDENT CONTACT:
CHEMTREC 800-424-9300 within the United States and Canada

SECTION 2: Hazards identification

Although OSHA has not adopted the environmental portion of the GHS regulations, this document may include information on environmental effects.

2.1 Classification of the substance or mixture
HCS 2012 (29 CFR 1910.1200)
Skin irritation, Category 2
Serious eye damage, Category 1
Specific target organ systemic toxicity - repeated exposure, Category 2,
Gastrointestinal tract
Liver
Respiratory Tract
H315: Causes skin irritation.
H318: Causes serious eye damage.
H373: May cause damage to organs through prolonged or repeated exposure if swallowed.

2.2 Label elements
HCS 2012 (29 CFR 1910.1200)
Pictogram :
Hydrogenated Tallow Amine

Signal Word: Danger

Hazard Statements:
H315 Causes skin irritation.
H318 Causes serious eye damage.
H373 May cause damage to organs (Gastrointestinal tract, Liver, Respiratory Tract) through prolonged or repeated exposure if swallowed.

Precautionary Statements:
Prevention
P260 Do not breathe dust/ fume/ gas/ mist/ vapors/ spray.
P264 Wash skin thoroughly after handling.
P280 Wear eye protection/ face protection.
P280 Wear protective gloves.

Response
P302 + P352 IF ON SKIN: Wash with plenty of soap and water.
P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310 Immediately call a POISON CENTER or doctor/ physician.
P332 + P313 If skin irritation occurs: Get medical advice/ attention.
P362 Take off contaminated clothing and wash before reuse.

2.3 Other hazards which do not result in classification

H400: Very toxic to aquatic life.
H410: Very toxic to aquatic life with long lasting effects.

Aspiration of the swallowed or vomited product can cause severe pulmonary complications.

SECTION 3: Composition/information on ingredients

3.1 Substance
Chemical nature: Amines

Hazardous Ingredients and Impurities

<table>
<thead>
<tr>
<th>Chemical Name</th>
<th>Identification number CAS-No.</th>
<th>Concentration [%]</th>
</tr>
</thead>
<tbody>
<tr>
<td>Amines, hydrogenated tallow alkyl</td>
<td>61788-45-2</td>
<td>95 - 99</td>
</tr>
</tbody>
</table>

The specific chemical identity and/or exact percentage (concentration) of composition has been withheld as a trade secret.

3.2 Mixture
Not applicable, this product is a substance.
SECTION 4: First aid measures

4.1 Description of first-aid measures

General advice: Show this material safety data sheet to the doctor in attendance. First responder needs to protect himself. Place affected apparel in a sealed bag for subsequent decontamination. Plan first aid action before beginning work with this product.

If inhaled: Remove to fresh air. If breathing is difficult, give oxygen. If breathing has stopped, apply artificial respiration. Consult a physician.

Skin contact: Take off contaminated clothing and shoes immediately. Wash off with soap and plenty of water. Wash immediately and thoroughly for a prolonged period (at least 15 minutes). Get immediate medical advice/attention.

Eye contact: Rinse with running water while keeping the eyes wide open (at least 15 minutes). Get immediate medical advice/attention.

Ingestion: Do not induce vomiting without medical advice. If victim is conscious: Rinse mouth with water. Keep at rest. Never give anything by mouth to an unconscious person. Do not leave the victim unattended. Vomiting may occur spontaneously. Risk of product entering the lungs on vomiting after ingestion. Lay victim on side. Seek medical advice.

4.2 Most important symptoms and effects, both acute and delayed

Risks: Skin contact may aggravate existing skin disease. Inhalation of product may aggravate existing chronic respiratory problems such as asthma, emphysema or bronchitis

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician: All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

Treat symptomatically. There is no specific antidote available.
SECTION 5: Firefighting measures

Flash point : ca.302 °F (150 °C)
              closed cup

Flammability class: Will burn

Autoignition temperature : no data available

Flammability / Explosive limit : no data available

5.1 Extinguishing media

Suitable extinguishing media : Water mist
                                 Carbon dioxide (CO2)
                                 Foam
                                 Dry powder

Unsuitable extinguishing media : Water spray jet

5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting : Under fire conditions:
                                     Will burn
                                     Corrosive or suffocating vapors are released.
                                     Container may rupture on heating.
                                     Avoid generating dust; fine dust dispersed in air in sufficient concentrations,
                                     and in the presence of an ignition source is a potential dust explosion hazard.
                                     Hazardous combustion products
                                     Nitrogen oxides (NOx)
                                     Carbon oxides

5.3 Advice for firefighters

Special protective equipment for fire-fighters : Firefighters should wear NIOSH/MSHA approved self-contained breathing apparatus and full protective clothing.

Specific firefighting methods : Contain the extinguishing fluids by diking (the product is hazardous for the environment).
                               Collect contaminated fire extinguishing water separately. This must not be discharged into drains.

Further information : In the event of fire and/or explosion do not breathe fumes.
                     Standard procedure for chemical fires.
                     Use a water spray to cool fully closed containers.
SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions, protective equipment and emergency procedures:
- Avoid contact with the skin and the eyes.
- Use personal protective equipment.
- Ensure adequate ventilation.
- For further information refer to section 8 "Exposure controls / personal protection."
- If spillage occurs on the public highway, indicate the danger and notify the authorities (police, fire service).

6.2 Environmental precautions

Environmental precautions:
- Prevent further leakage or spillage if safe to do so.
- Do not allow uncontrolled discharge of product into the environment.
- Contain the spilled material by diking.
- Spills may be reportable to the National Response Center (800-424-8802) and to state and/or local agencies.

6.3 Methods and materials for containment and cleaning up

Recovery:
- Shovel or sweep up.
- Pick up and transfer to properly labeled containers.
- Keep in suitable, closed containers for disposal.
- Never return spills in original containers for re-use.

Decontamination / cleaning:
- Wash off with plenty of water.
- Clean contaminated surface thoroughly.
- Recover the cleaning water for subsequent disposal.
- Decontaminate tools, equipment and personal protective equipment in a segregated area.

Disposal:
- In accordance with local and national regulations.
- Dispose of contents/ container to an approved waste disposal plant.

Additional advice:
- The product should not be allowed to enter drains, water courses or the soil.

6.4 Reference to other sections

No data available
SECTION 7: Handling and storage

7.1 Precautions for safe handling

Technical measures : Potential dust explosion hazard. Non-sparking tools should be used. Ensure all equipment is electrically grounded before beginning transfer operations.

Advice on safe handling and usage : The product must only be handled by specifically trained employees. Avoid inhalation, ingestion and contact with skin and eyes. If it is handled as a liquid, there is significant hazard of 1st, 2nd and 3rd degree burns.

Hygiene measures : Personal hygiene is an important work practice exposure control measure and the following general measures should be taken when working with or handling this materials:
   1) Do not store, use, and/or consume foods, beverages, tobacco products, or cosmetics in areas where this material is stored.
   2) Wash hands and face carefully before eating, drinking, using tobacco, applying cosmetics, or using the toilet.
   3) Wash exposed skin promptly to remove accidental splashes or contact with material.

7.2 Conditions for safe storage, including any incompatibilities

Technical Measures for storage : Take all necessary measures to avoid accidental discharge of products into drains and waterways due to the rupture of containers or transfer systems.

Storage conditions

Recommended : Keep in a dry, cool and well-ventilated place. Store in original container. Keep tightly closed.

To be avoided : Keep away from open flames, hot surfaces and sources of ignition. Keep away from incompatible materials to be indicated by the manufacturer

Incompatible products : Do not mix with incompatible materials (See list, section 10).

Packaging Measures

Packaging materials—Recommended : Steel drum, Coated steels.

Storage stability

Storage temperature : 39 - 120 °F (4 - 49 °C)

7.3 Specific end use(s)

No data available
SECTION 8: Exposure controls/personal protection

Introductory Remarks:
These recommendations provide general guidance for handling this product. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. While developing safe handling procedures, do not overlook the need to clean equipment and piping systems for maintenance and repairs. Waste resulting from these procedures should be handled in accordance with Section 13: Disposal Considerations.

Assistance with selection, use and maintenance of worker protection equipment is generally available from equipment manufacturers.

8.2 Exposure controls

Control measures

Engineering measures: Where engineering controls are indicated by use conditions or a potential for excessive exposure exists, the following traditional exposure control techniques may be used to effectively minimize employee exposures:

Effective exhaust ventilation system
Handling molten product:
Avoid splashes.

Personal protective equipment

Respiratory protection: Use a respirator with an approved filter if a risk assessment indicates this is necessary.

When respirators are required, select NIOSH/MSHA approved equipment based on actual or potential airborne concentrations and in accordance with the appropriate regulatory standards and/or industrial recommendations.

Hand protection: Glove material: Neoprene
Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time.
Gloves must be inspected prior to use.
Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.

Eye protection: Tightly fitting safety goggles

Eye and face protection requirements will vary dependent upon work environment conditions and material handling practices. Appropriate ANSI Z87 approved equipment should be selected for the particular use intended for this material.

Eye contact should be prevented through the use of:

Face-shield

Skin and body protection: impervious clothing
Safety shoes
Choose body protection according to the amount and concentration of the dangerous substance at the work place.
Remove and wash contaminated clothing before re-use.

Hygiene measures: Personal hygiene is an important work practice exposure control measure and the following general measures should be taken when working with or handling this materials:
1) Do not store, use, and/or consume foods, beverages, tobacco products, or cosmetics in areas where this material is stored.
2) Wash hands and face carefully before eating, drinking, using tobacco,
applying cosmetics, or using the toilet.
3) Wash exposed skin promptly to remove accidental splashes or contact with material.

Protective measures: Ensure that eyewash stations and safety showers are close to the workstation location. The protective equipment must be selected in accordance with current local standards and in cooperation with the supplier of the protective equipment. Selection of appropriate personal protective equipment should be based on an evaluation of the performance characteristics of the protective equipment relative to the task(s) to be performed, conditions present, duration of use, and the potential hazards, and/or risks that may occur during use.

SECTION 9: Physical and chemical properties

Physical and Chemical properties here represent typical properties of this product. Contact the business area using the Product information phone number in Section 1 for its exact specifications.

9.1 Information on basic physical and chemical properties

Appearance: Form: solid
Physical state: solid (77 °F (25 °C))
Color: white

Odor: no data available
Odor Threshold: no data available

pH: no data available
Aqueous alcohol solution

Melting point/freezing point: 100 - 131 °F (38 - 55 °C)

Boiling point/boiling range: 482 - 662 °F (250 - 350 °C) (0.76 mmHg (1.013 hPa))

Flash point: ca. 302 °F (150 °C) closed cup
Flammability class: Will burn

Evaporation rate (Butylacetate = 1): no data available

Flammability (solid, gas): no data available
Flammability (liquids): no data available
Flammability / Explosive limit: no data available
Autoignition temperature: no data available
Vapor pressure: no data available
Hydrogenated Tallow Amine

Vapor density : no data available

Density : Relative density : ca. 0.8 (68 °F (20 °C))

Solubility : Water solubility :
            (77 °F (25 °C)) insoluble

Partition coefficient: n-octanol/water : log Pow: ca. 7.3

Thermal decomposition : no data available

Viscosity : Viscosity, dynamic : 5 - 20 mPa.s (122 °F (50 °C))
            Viscosity, kinematic : 6.3 mm2/s (140 °F (60 °C))

Explosive properties : no data available

Oxidizing properties : Not considered as oxidizing. Structure-activity relationship (SAR)

9.2 Other information

Molecular weight : ca. 263 g/mol

SECTION 10: Stability and reactivity

10.1 Reactivity

Reactivity : Stable at normal ambient temperature and pressure.

10.2 Chemical stability

Chemical stability : Stable under recommended storage conditions.

10.3 Possibility of hazardous reactions

Polymerization : Hazardous polymerization does not occur.

10.4 Conditions to avoid

Conditions to avoid : Extremes of temperature and direct sunlight.
Keep away from heat and sources of ignition.
Avoid dust formation.
10.5 Incompatible materials
Materials to avoid: Strong oxidizing agents
Strong acids

10.6 Hazardous decomposition products
Decomposition products: On combustion or on thermal decomposition (pyrolysis), releases:
(Carbon oxides (CO + CO2)).
Nitrogen oxides (NOx)

SECTION 11: Toxicological information
11.1 Information on toxicological effects

Acute toxicity

Acute oral toxicity
Amines, hydrogenated tallow alkyl
LD50: 4,800 mg/kg - Rat
Method: OECD Test Guideline 401
May be harmful if swallowed.
Unpublished reports

Acute inhalation toxicity: no data available

Acute dermal toxicity
Amines, hydrogenated tallow alkyl
Method: OECD Test Guideline 402
By analogy
Not classified as harmful by contact with skin
Unpublished reports

Acute toxicity (other routes of administration): no data available

Skin corrosion/irritation

Skin irritation
Amines, hydrogenated tallow alkyl
Rabbit
Irritating to skin.
Method: OECD Test Guideline 404
Unpublished reports

Serious eye damage/eye irritation

Eye irritation
Amines, hydrogenated tallow alkyl
Rabbit
Risk of serious damage to eyes.
Method: OECD Test Guideline 405
Unpublished reports
Respiratory or skin sensitization
Sensitization : no data available

Mutagenicity
Genotoxicity in vitro
Amines, hydrogenated tallow alkyl : Ames test
with and without metabolic activation
negative
Information given is based on data obtained from similar substances.
Unpublished reports

Genotoxicity in vivo
Amines, hydrogenated tallow alkyl : In vivo micronucleus test - Rat
negative
Information given is based on data obtained from similar substances.
Unpublished reports

Carcinogenicity
Carcinogenicity : no data available

This product does not contain any ingredient designated as probable or suspected human carcinogens by:
NTP
IARC
OSHA
ACGIH

Toxicity for reproduction and development
Toxicity to reproduction / fertility
Amines, hydrogenated tallow alkyl : Rat
Oral
Method: OECD Test Guideline 421
no impairment of fertility has been observed
Information given is based on data obtained from similar substances.
Unpublished reports

Developmental Toxicity/Teratogenicity
Amines, hydrogenated tallow alkyl : Rat
Application Route: Oral
Method: OECD Test Guideline 414
no teratogenic effects have been observed
Information given is based on data obtained from similar substances.
Unpublished reports

Rabbit
Application Route: Oral
Method: OECD Test Guideline 414
no teratogenic effects have been observed
Information given is based on data obtained from similar substances.
Unpublished reports
STOT
STOT-single exposure
Amines, hydrogenated tallow alkyl
Target Organs: Respiratory organs
Toxicology Assessment:
May cause respiratory irritation.
By analogy

STOT-repeated exposure
Amines, hydrogenated tallow alkyl
Target Organs: Gastrointestinal tract, Liver, Respiratory Tract
Toxicology Assessment:
May cause damage to organs through prolonged or repeated exposure.
Unpublished reports, Published data

Amines, hydrogenated tallow alkyl
May cause damage to organs through prolonged or repeated exposure if swallowed. By analogy
Harmful: danger of serious damage to health by prolonged exposure if swallowed.
Unpublished reports
Published data

Aspiration toxicity
Aspiration toxicity
molten
May be harmful if swallowed and enters airways.

SECTION 12: Ecological information

12.1 Toxicity

Aquatic Compartment
Acute toxicity to fish
Amines, hydrogenated tallow alkyl
LC50 - 96 h: 0.88 mg/l - Danio rerio (zebra fish)
Method: OECD Test Guideline 203
Very toxic to fish.
Unpublished reports

Acute toxicity to daphnia and other aquatic invertebrates.
Amines, hydrogenated tallow alkyl
EC50 - 48 h: 0.16 mg/l - Daphnia magna (Water flea)
Method: OECD Test Guideline 202
Very toxic to aquatic organisms.
Unpublished reports

Toxicity to aquatic plants
Amines, hydrogenated tallow alkyl
EC50 - 96 h: 0.12 mg/l - Scenedesmus subspicatus
Method: OECD Test Guideline 201
By analogy
Very toxic to algae.
Growth rate
Unpublished reports
Toxicity to microorganisms
Amines, hydrogenated tallow alkyl : EC50 : 490 mg/l
Method: OECD Test Guideline 209

Ecotoxicity assessment
Acute aquatic toxicity
Amines, hydrogenated tallow alkyl : Very toxic to aquatic life.

Chronic aquatic toxicity
Amines, hydrogenated tallow alkyl : Very toxic to aquatic life with long lasting effects.

M-Factor
Amines, hydrogenated tallow alkyl : Acute aquatic toxicity = 10
Chronic aquatic toxicity = 10
(according to the Globally Harmonized System (GHS))

12.2 Persistence and degradability

Biodegradability
Biodegradability
Amines, hydrogenated tallow alkyl : Method: OECD Test Guideline 301 D
75 % - 28 d
Readily biodegradable.
Theoretical oxygen demand
Unpublished reports

12.3 Bioaccumulative potential
Bioconcentration factor (BCF)
Amines, hydrogenated tallow alkyl : By analogy
Bioaccumulative
internal evaluation

12.4 Mobility in soil
No data available

12.5 Results of PBT and vPvB assessment
Results of PBT and vPvB assessment
Amines, hydrogenated tallow alkyl : This substance is not considered to be persistent, bioaccumulating, and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulating (vPvB).

12.6 Other adverse effects
Environment assessment
Amines, hydrogenated tallow alkyl : Very toxic to aquatic life.
Very toxic to aquatic life with long lasting effects.
SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product Disposal

Advice on Disposal: Chemical additions, processing or otherwise altering this material may make the waste management information presented in this MSDS incomplete, inaccurate or otherwise inappropriate. Please be advised that state and local requirements for waste disposal may be more restrictive or otherwise different from federal laws and regulations. Consult state and local regulations regarding the proper disposal of this material.

Waste Code: EPA:
Hazardous Waste – NO

Advice on cleaning and disposal of packaging

Advice: Completely empty the packaging prior to decontamination.

Other data: Dispose of in accordance with local regulations.

SECTION 14: Transport information

Transportation status: IMPORTANT! Statements below provide additional data on listed transport classification. The listed Transportation Classification does not address regulatory variations due to changes in package size, mode of shipment or other regulatory descriptors.

The information provided in this Safety Data Sheet is correct to the best of our knowledge, information, and belief at the date of its publication. Such information is only given as a guidance to help the user handle, use, process, store, transport, dispose, and release the product in satisfactory safety conditions and is not to be considered as a warranty or quality specification. It should be used in conjunction with technical sheets but do not replace them. Thus, the information only relates to the designated specific product and may not be applicable if such product is used in combination with other materials or in another manufacturing process, unless otherwise specifically indicated. It does not release the user from ensuring he is in conformity with all regulations linked to its activity.
